

RAPACIOUS TAXATION

There is no such thing as government money. It is the people's money, yours and mine. Tax dollars exacted from the people's earnings are erroneously referred to as government money. Whenever and wherever government spends money, remember it is the people's tax dollars it is spending. Also, remember that government spending begets taxes.

When government spending out-races inflow of tax dollars, the government mortgages the people's future earnings as security for borrowing money to help pay current obligations. It is your tax dollars and mine that pay the burdensome interest on such borrowing. It will be the people's tax dollars that must, sometime, pay off the ever increasing huge national debt of over three hundred billion dollars.

It behooves every tax paying citizen to think, and seriously so, about rapacious taxation eating away his earnings.
