GENERAL INSTRUCTIONS:

Make the first Shot Count:

Do not kill a game animal in any area where it is impossible to pack it out. Never kill an elk without first making arrangements to have it packed out after the kill. Report any violation of the game laws to a game protector or the State Game Department, 515 Smith Tower, Seattle, Washington. El. 2633.

Instructions for the Care of Big Game: Any person hunting deer or elk should have in possession or available for his use the following equipment:

1. A good skinning knife.
2. A hand axe or hatchet.
3. Rope enough to hang up a deer or the four quarters of an elk.
4. Muslin or cheesecloth sufficient to cover a deer or the quarters of an elk.
5. Canvas sufficient to protect meat from rain or to roll deer carcass in if desired.

Care of Deer: Immediately after killing, a deer should be bled. Then it should be hung up and dressed by opening the entire length of the belly from the base of the tail to the front of the ribs. All viscera including heart and liver should be removed to speed cooling. Then it should be propped open and allowed to cool at least over one night. If flies are present it should be wrapped with muslin or cheesecloth. All moisture should be wiped out of the carcass and it should never be washed with water, or be allowed to become wet from rain.

Some hunters successfully care for meat in warm weather by hanging the deer in the open at night and taking it down when still cool in the morning and wrapping it in a large canvas and depositing it in a cool shady place during the day.

Where possible it is always best to take a deer to a local cold storage plant if it is to be held for several days.

Care of Elk: Elk is handled much the same as deer except that it should also be skinned and quartered at the time that it is dressed. The quarters will re-

main in best condition if they can be placed in muslin bags. They should be hung in a well ventilated place as they cool much more slowly than deer. It is very important that the meat be kept completely dry at all times.

Tagging with Big Game Seal: On male deer and elk the big game seal shall be placed and locked around the base of the branched antler. The seal so placed must be the one issued to the person killing the animal. Where female or spike deer or elk are taken the big game seal should be attached through a hole pierced in the ear.

Immediately after the close of the season the Report of Hunt card must be filled out and mailed to the Department of Game.

Duck Stamp: Any citizen under the age of 16 years may hunt migratory waterfowl without a duck stamp.

Bounty: Any resident citizen under the age of 16 years may collect bounty on certain predatory animals without a hunting and fishing license.

COOPERATION WITH FARMERS: Since small game hunting is conducted largely on privately-owned farm

lands, your favorite sport depends on your being a good sportsman. When you hunt on a farm, recognize the fact that you are in reality the guest of the farmer. Respect him accordingly, aid in protecting his property, and less land will be posted against hunting. He will be your friend if you and other hunters treat him honorably.

EVERY GOOD SPORTSMAN WILL:

1. Ask a farmer's permission to hunt on his land. Park your car where it won't interfere with him.
2. Never cut or otherwise damage fences, nor leave gates open or bars down, nor destroy posters.
3. Never shoot near buildings or livestock, nor where men are working.
4. Never overlook an act of vandalism or a violation of law by another hunter. Report such acts to the proper person, either a game protector, the farmer or person in charge of the land.
5. Cultivate the friendship of the farmer or the person in charge of the land.

TEN COMMANDMENTS OF SAFETY: REMEMBER the gun is ALWAYS loaded—even when you are positive that it is not. These are just a few of the rules laid down by a careful hunter:

1. **TREAT** every gun with the respect due a loaded gun. This is the cardinal rule of gun safety.
2. **CARRY ONLY** empty guns, taken down or with the action open, into your automobile, camp, and home.
3. **ALWAYS** be sure that the barrel and action are clear of obstructions.
4. **ALWAYS** carry your gun so that you can control the direction of the muzzle even if you stumble.
5. **BE SURE** of your target before you pull the trigger.
6. **NEVER** point a gun at anything you do not want to shoot.
7. **NEVER** leave your gun unattended unless you unload it first.
8. **NEVER** climb a tree or a fence with a loaded gun.
9. **NEVER** shoot at a flat hard surface or the surface of water.
10. **DO NOT** mix gunpowder and alcohol.
