

Dec. 9, 1957

Mr. John Ulrich, Department of Interior,
Division of Information N.W. Regional Office,
Box 3557, Portland, Oregon.

Dear John:

Don't know of a better man than to make an inquiry of concerning some photographs for potential use with an idea that is turning over in my mind: Application of art on dams, power houses etc.

My specific needs, which would serve several purposes, would show use of statuary or art work on exterior of dam, and specifically over door of power house or some structure of the dam, a door having the focal point of interest.

I would only need three of four, provided they were pictures showing relief work and work in the round, both.

I have a recollection about Chief Joseph's head, in relief, at the Chief Joseph Dam, and would be especially interested in that.

I don't know whether you have access to material of this nature or not, but if not, perhaps you could forward my request to the proper authority and it would be appreciated.

This material should be directed to my personal attention, if sent to the office, or to 1212 N. 32nd Ave., Yakima.

My best regards to Bobbie, to Don, Perry and others who are my very good friends in Portland. Haven't had a chance to say hello on any of my few rushed trips there, but I most certainly will when I have the chance.

Sincerely
