Office manager:

Dear Sir:

I am writing to obtain three (3) globes for my microfilm scanner, which I have been unable to obtain from various companies at Seattle you previously noted could provide such.

And in view of an already long delay and the fact that I need the globes to continue important work, will you please see that they are rushed out, via Air Mail. Please. I will send payment for the globes and carrying charges of course.

The equipment I have is a Spencer scanner.

The plate on it contains this information:

Microfilm Reader. 100 Watts . 115 volts.

Model 3,400.

Again, may I note that immediate shipment of three globes for the kind of instrument noted will be highly appreciated, since some work I am doing, must be completed within less than two weeks from this time!

Sincerely
