**Inside Intelligence Report:**

## **SOVIET MISSILE MENACE**

"The United States is again at the crossroads in its efforts to deter a major war. The present crisis is traceable primarily to our lag in the development and deployment of an anti-ballistic missile system capable of effective defense against an attack by the Soviet Union."

Thus begins the text of TRIUMPH's revealing and alarming report on the missile controversy. The author of the article had to remain anonymous because of the delicate position he holds in the field of missile intelligence and strategy.

Based on U.S. intelligence information that has been kept from the American people, the author reveals some startling facts about U.S./Soviet missile strategy—facts that you should know about! Here is just a sampling of what you will learn from this vitally important report:

- **Background of the dilemma: history of U.S. nuclear strategy since World War II.**
- **Is there a U.S. "missile gap"? Yes, and it will grow wider if McNamara doesn't heed the advice of Congress and the Joint Chiefs of Staff.**
- **The 1963 Test Ban Treaty: why Russia was willing to sign it and why we should not have.**
- **Does the Soviet Union have an "area" defense system, contrary to what LBJ told the American people?**
- **What effects do recent Soviet breakthroughs in multiple warheads for offensive missiles have on our strategy?**
- **Is our "deterence" policy now obsolete?**
- **What we must do to catch up.**

The author gravely warns "our time is running out." He concludes that, "Unless decisions are made soon, the danger of nuclear war could vastly increase, to say nothing of successful nuclear blackmail."
