On Loan

18 typescripts from
newspapers

(not in chronological
order)

You are welcome to scan or copy, as you desire to, all or any of miscellaneous typescript material pertaining to The State College. I will not have use for any of this material for some time, but please return it in say a month.

I believe I have other scattering references in unfiled material but like the attached, I believe it is of little importance aside from the "Yakima" feeling over selection of the college site. I guess you know far better than I, Yakima lost out on the state capitol when Ellensburgh (Ellensburg) interceded with a bid for herself. Then Yakima thought she had the college site sewed up, and that blew. Then Yakima was given a state fair.

I have a small file on early fair accounts, nothing indicating the college angle however.

Sincerely
