Dr. C.B. Coulter,
College of Puget Sound,
Tacoma, Washington.

Dear Dr. Coulter:

Enclosed are a few clippings pertaining to your visit to the Yakima Valley in pursuance of your research project dealing with Irrigation in the Yakima Valley. I hope it was written satisfactorily.

Under separate cover I am sending a copy of the Sunday Herald containing special material concerning the International Apple Association convention here. There may be fragments of modern-day irrigation references etc. found therein.

I have just returned from a vacation, hence the delay at forwarding clippings.

I enjoyed very much meeting with you and your wife. I feel that the material provided you has been very sketchy, but as time goes on, perhaps I will be able to enlarge upon it. I would be interested in knowing your reaction to the type of material found in the typescripts, so I can determine if further copies made from old papers, that I may have in my files, will provide any help to you.

I will be interested too, in ~~determining~~ determining whether the story has aided in any contacts with possible source material. I trust I may be of further meager assistance in your most worthwhile project. Please keep me informed as to progress, and any unusual developments.

Sincere regards
