

Mr. Carl Bennett,
The Wagon Wheel,
White Swan.

March 31, 1953

Dear Carl:

I've been too busy , till now, to write you a well deservod "thank you," for your part in the successful field day. You helped out very much.

I note, too that the original story, or in some of them, the printer drop ed off your name as "hite Swan committeeman. I'm enclosing clippings to show it was taken care of in later stories. And the radio took care of it too.

I'm sending along, too, some typescripts of some Olney material that you may read and then pass on to George with my compliments. They are from Department of the Army records so are official. I doubt if he or his family has ever read them.

I am still plugging along writing notes, etc. If you have some notes to jot down about the trip, do that so they won't be forgotten.

Mrs. Kimmel's husband is an expert on guns , cartridges and can identify, to the year nearly, the caps you picked up.

Keep your eye open for someone who can tell us more about the Piutes, where they actually lived. George said out by the mill. The records in the agency say on Topenish Creek, six, and sometimes seven, miles from the agency.
