Here's a tip for better dial telephone service. You'll save time... and wrong numbers... if you wait for the dial tone before you dial. Listen for the steady hmmm... it's your "go ahead" signal.

YOU CAN HELP

You want the best telephone service possible. We want you to have it! Will you cooperate with us in the following ways, in order that your telephone calls at all times may be clear and satisfactory?

- Please speak directly into the transmitter with lips just clearing the mouthpiece.
- Please speak distinctly and not too rapidly.
- Please do not shout—just use your normal talking voice.
- Please be sure of the number before calling. If in doubt, please look it up in the directory. That saves you annoyance—and somebody else unnecessary steps.

General Information

GENERAL PRACTICES AND TARIFFS

Copies of our tariffs showing our general practices and rates are available at our Business Office and are open to public inspection.

SERVICE DIFFICULTIES

To report your telephone out of order or other service difficulties, call Repair Service. We realize that difficulties sometimes occur in spite of our best efforts to avoid them. When they do, we are anxious to correct them promptly.

The Telephone Company will appreciate prompt reports from anyone concerning poles, wires or other telephone equipment that endanger life or property. Call for Repair Service to report such conditions.

ATTACHMENTS TO TELEPHONES AND DIRECTORIES

Attachments or devices, except as authorized by the Telephone Company, are not permitted in connection with telephone facilities or directories.

PROPERTY RIGHTS

The patron has no property right in the telephone number or the right to continuance of service through a certain exchange, and the Telephone Company may change the telephone number or the exchange through which connections are made, whenever it deems it necessary in the conduct of its business.

APPLICATIONS FOR NEW SERVICE MOVES AND DISCONTINUANCE OF SERVICE

To arrange for the installation of new service it is desirable that you call at our Business Office. If this is not convenient, however, telephone us and we shall be glad to forward you an application for service prepared for your signature.

If you wish telephone service discontinued or instruments moved from one location or address to another location or address, the Business Office should be notified by telephone or letter five days in advance.

Rates for all types of telephone service in this exchange will be quoted at our Business Office.

BILLS FOR SERVICE

Bills are issued monthly and are payable when rendered. Charges for local service cover one month in advance. Charges for long-distance service cover one month up to date of bill. When paying in person at the Business Office, it will save time and avoid errors if you bring your bill with you. When paying by mail, please enclose the bill stub.

Information concerning bills, payments and other matters concerning accounts can be secured from our Business Office.

FEDERAL TAX

Charges for exchange service and telephone and telegraph messages are subject to Federal Tax.

DIRECTORY LISTINGS

Errors. Please check your listings when you receive a new directory. If it is incorrect, notify the Business Office at once so we may correct our records and protect your service in the meantime.

Additional Listings are sometimes needed and are available at a nominal charge. (1) **Additional Residence Listings**—for members of the household who have a different surname. (2) **Additional Business Listings**—for the man who needs his own name in the directory, in addition to his firm's name. (3) **Additional User Service**—for separate firms who occupy one office. (4) **Alternate Call Listing**—to direct calls to another number when there is no one to answer at the first listing, or after hours.

The Telephone Directory. This directory is issued by the General Telephone Company of the Northwest and remains the property of the Company.

Kennewick, Wash.

Local Telephone Service

THOUGHTFUL ITEMS OF PROCEDURE

Please answer promptly, giving your name or number.

Please use the correct telephone number. Refer to the directory.

Please be sure to allow ample time for the called number to answer.

Please be on the line when the person you called answers.

Please speak slowly and clearly straight into the mouthpiece with the lips just clearing it.

Please make the conversation short, especially on party lines. Be a good neighbor and give others a chance.

Please replace the receiver gently when through.

Please teach children to use the telephone properly.

OBTAIN CORRECT TELEPHONE NUMBERS

Obtain the correct telephone number from the current issue of the telephone directory. If the number is not found in the telephone directory, ask for **INFORMATION**, who will

give you the correct number. Numbers of frequently called telephones, when secured from information, may be entered in the **FREQUENTLY CALLED NUMBERS** space provided in this directory.

HOW TO PRONOUNCE NUMBERS

Telephone numbers should be given to the operators as shown in the following example: "130-J" should be pronounced "One-three-oh-Jay." There is an exception to this rule when the number is an even hundred or even thousand. For example: 600 should be pronounced "six hundred," and 1000 should be pronounced "one thousand."

TO CALL FROM A COIN BOX TELEPHONE

Read the instructions placed near the telephone which explains the operation of coin box (pay station) telephones.

Requests for refunds on erroneous charges should be reported promptly to the Chief Operator.

Long Distance Service

DIAL "0" (OPERATOR)

Tell the Operator:

1. The city or town you want.
2. The out-of-town telephone number, if available, or the name under which it is listed. **FOR EXAMPLE:** — "Calling Omaha, Nebraska—Walnut 3456." (If you don't know the telephone number) "Calling Omaha, Nebraska—anyone at Mr. J. Lowell's residence, 34 Blank Street."
3. Your telephone number (and name if required) when requested by the operator.

STATION CALLS

The above is a station call because you have not asked the operator to connect you with a particular person or a particular telephone or department reached through a private switchboard. The charge for a station call is slightly less than for a person call and begins when the called telephone or private switchboard attendant answers.

PERSON CALLS

When you want to be connected with a particular person or with a particular telephone or department reached through a private switchboard, simply give the operator the

same information as above and the name of the person or department wanted, also the extension number if known. The charge is slightly more than for a station call and begins when you reach the person, extension or department you want.

USING THE CALLED NUMBER

It saves time if you know the number. Information can get it. Make a note of frequently called numbers.

QUOTING CHARGES

Ask the operator at the time you place the call, if you wish the charges quoted at the end of conversation. Hang up the receiver when you finish, you will be called.

COLLECT CALLS

Tell the operator before placing the call that it is to be "collect" (Paid for by the called number). There is no difference in the charge except on station calls where the rate is 25c or less.

FEDERAL TAX

Charges for telephone calls and telegrams are subject to federal tax.

Conversation Recording

A short high "beep" tone heard on the telephone line about every 15 seconds means that the person with whom you are talking is recording your telephone conversation through his own electrical recording machine connected to the line.

This signal is for your protection. If you do not want a record made of what you are saying, ask the person with whom you are

talking to disconnect the recording machine. Then wait until the signal is no longer heard before resuming conversation.

The "beep" is produced automatically by the device used to connect the recorder to the telephone line. It stops when the recorder is disconnected. Use of a recorder without this signal is unlawful.

How to Use the Dial Telephone

OBTAIN CORRECT TELEPHONE NUMBERS

Obtain the correct telephone number from the current issue of the telephone directory. If the number is not found in the telephone directory dial 0 for INFORMATION who will give you the correct number. Numbers of frequently called telephones when secured from Information can be entered in the FREQUENTLY CALLED NUMBERS space provided in this directory.

LISTEN FOR DIAL TONE

After removing the receiver you will hear a "humming" sound known as the dial tone which indicates that the equipment is ready to receive your call. Do not start to dial until you have heard the dial tone.

DIALING

Dial each figure of the number as shown in the directory. In order to dial place your finger in the opening through which the first figure of the number is seen. Rotate the dial around to the finger stop. Release the dial and allow it to return without interference. Speeding up or holding back the dial on its return will cause the equipment to function improperly which may cause a wrong number.

For example if you wish to dial "2201":

1. Remove the receiver and listen for the dial tone. Do not jiggle the hook in removing the receiver or while dialing, as it will result in a wrong number.
2. When the dial tone is heard place your finger firmly in the opening where you see the figure "2."
3. Rotate the dial clockwise until your finger strikes the finger stop.
4. Remove your finger from the opening and allow the dial to return of its own accord.
5. When the dial has stopped proceed in the same manner with the figure "2" and then with the figure "0" and "1."

If your finger slips in the dial or if you discover that you have made a mistake hang up the receiver for a few seconds, remove it, listen for the dial tone and start your call again.

If you repeatedly encounter the busy signal or you have reason to believe that the line is not busy or if you have difficulty in dialing another party on your own line, dial 0 and explain the situation to the operator and she will assist you.

THE RINGING SIGNAL

The ringing signal is an intermittent "burring" sound which informs you that the bell of the called number is ringing.

THE BUSY SIGNAL

The busy signal is a rapid "Buzz-Buzz-Buzz" sound and informs you that the called line is busy. When you hear this signal after dialing a number hang up the receiver and call again after a reasonable time. To become familiar with the busy signal, dial your own number and listen.

TO CALL ANOTHER PARTY ON YOUR LINE

You may identify another subscriber as being on your line if the first three digits of his number are the same as the first three digits of your number.

To call a party on your line, call the listed directory number. Such calls must be made as follows:

1. Remove receiver from hook and listen for dial tone.
2. After dial tone is heard dial the listed number. A busy tone will be heard. Leave receiver to your ear and hold receiver hook down. A slight burring sound will be heard, informing you the called telephone is ringing. When the burring quits, the called party has answered. Let up receiver hook and talk to your party.

Party line service in order to be efficient, depends on how the subscribers on the party line use it. Party Line Conversations should be limited to Five Minutes' Duration in order to give all parties on the line an equal opportunity to use the same. Do not allow children to play with the telephone, as this interferes with the service. Teach the children how to use the telephone properly. Do not leave the receiver down on the party line, as this causes the line to be out of service and in cases of emergencies, fire, sickness or otherwise, the parties are not able to obtain any service.

HOW TO MAKE AN EMERGENCY CALL IN THE DARK

If it is necessary to make an emergency call in the dark, remove the receiver, listen for the dial tone and then place your finger in the first dial opening below the finger stop and rotate the dial clockwise until your finger strikes the finger stop. Then release the dial and let it return to its normal position. An operator will answer. Give her your number, the details of your call and she will assist you.

LOSS of TIME and INCONVENIENCE...

★
resulting from calling wrong numbers can be avoided by consulting the current directory before placing a call and by avoiding the use of obsolete directories.

★

You Can Help Us to Speed and Improve Your Telephone Service

1. By consulting the information pages in the front of your telephone directory.
2. By making sure of the number before calling.
3. By speaking directly, clearly and slowly into the mouthpiece.
4. When called, by answering promptly.
5. By identifying yourself by name or firm when answering.
6. By hanging up gently.

Your telephone contains about two hundred parts, some quite delicate. We want you to have the best possible service at all times, and appreciate your cooperation in handling your telephone carefully.

FREQUENTLY CALLED NUMBERS

This space is provided for your convenience in listing frequently called numbers that are not shown in this, your local directory.
