LIGHTWEIGHT FIBERGLASS

NEW PRODUCTS NEWS RELEASE

Many new and unusual lightweight fiberglass products are now being offered by a California concern. They are specializing in the duplication and reproduction of natural and carved stone textured items. Among the list of items now available are authentic reproductions of natural stone Waterfalls, complete with recirculating pumps, Wall Fountains that are sculptured modernizations of old world Sculptures and many Garden Ornaments, normally seen in carved wood.

The finished products are only a fraction of the weight of the conventional materials they simulate, and the end uses have been in Pent-house Landscaping projects, Multi-Story movable water displays and rapid installations of self-contained fountains for the Building Industry.

All of the self-contained fountains, waterfalls and water displays furnished by this concern are shipped complete with necessary piping and pumps installed. The on-site installation procedure usually consists of "the addition of water only".

A detailed catalog is available by writing directly to JABON STUDIOS, 14847 Bessemer Street, Van Nuys, California.

ROMAN FOUNTAINS

WATER DISPLAYS

JABON STUDIOS

creators and manufacturers of fine art pieces in
LIGHTWEIGHT FIBERGLASS

Gentlemen:

What is more beautiful than Water Sculpture or the sound of cascading waters?

Yet, to construct a fountain or waterfall in conventional materials can be an expensive and complicated procedure.

The enclosed catalog pages will give you the opportunity to offer a wide selection of self-contained fountains to your clientele.

All of these water displays offer you the following advantages;

1. **Lightweight** — (Made of indestructable fiberglass)
2. Suitable for **interior or exterior use** — will not rot, rust or corrode.
3. **Delivered complete and ready for use** — no installations required.
4. Available in a wide choice of colors and finishes.
5. **Time proven sales experience from thousands of Dealers.**
6. Your net costs are **retail prices less 50%.**

Because these fountains are lightweight, freight charges are nominal; For example, 100 pounds to New York City is only \$9.37.

Many of these items can be shipped in units of three for the cost of one.

The modern trend to decorate with water is now available to you and your staff, by adding many of these items to your present line of decorative items.

Thank you,

JABON STUDIOS

NEWS RELEASE

BUILDING VALUES INCREASE WITH THE USE OF DECORATIVE WATER DISPLAYS.

Because present day local building and zoning requirements call for leaving a portion of property free of structures, landscaping these areas is necessary to avoid large paved and uninteresting expanses around a new building.

Many mortgage lending institutions allow a percentage of the costs of improvements such as decorative fountains, landscaping and street furniture to be included in the main trust deed.

A catalog describing fountains, water displays, planters and street furniture is available from Roman Fountains, Inc., 7251 N. Varma Avenue, North Hollywood, California, 91605
