Nov. 24, 1954

Mr. Kenneth Crow, power use consultant,
Public Utility District No. 2 of Grant County,
Ephrata, Washington.

Dear Mr. Crow:

Enclosed are two (2) copies of a rough draft of a yarn designed to be used , if satisfactory, with one of the pictures of Indians and white men.

Understanding that there may be reasons contrary to my unlearned mind in this matter, I sincerely request that you feel free to make notes on one of the copies for proposed changes, returning it , or if necessary take more drastic action. I leave it to your better judgment. And if it passes muster, you are welcome to use the material as you desire.

Congressman Hal Holmes, who long ago told me that he would confer with me concerning the Wanapums after the ardors of campaigning, did so yesterday. I asked him to feel free to mention our meeting in event he saw any of you people and assured him that in view of the way matters were working out I saw no necessity for me to pursue my request for Congressional action or Presidential Proclamation.

I hope with the attached article I have "laid" the dead Indians and can now go on to other matters, the historical background of Priest Rapids of later years [of which I have abundant material]; and educate myself in the fine art of the technicalities of dam building. Surely too, the attached, will help pave the way for what should be highly interesting stories and pictures of the pictographs, pectoglyphs and carvings, in due season.

Best Regards
