Dear Mrs. Knapp:

Pulled out some boxes of stored notes, negatives etc. tonight, and thus far haven't connected with any of the meixdocre Mineral King stills.

Am sending you personally an out of print booklet (?) 65,000 words, written for the Yakima Tribe, in case you have a personal interest in Indians. I've a hard cover book, out of print that seldom shows on the market and the last time out brought \$40 at Seattle! (sorry about that)

Also, a newspaper tear sheet of a couple of recent happenings along the Columbia.

Nothing special in this other than in case you have a personal interest in such things.

I hope to have time to sketch out some random thoughts about the Mineral King country, flora and fauna that may or may not give you an idea. The more I've thought about the negatives, the less use I suspect they will have for you, only very general and "go from there on."

The names I mentioned, Sol Sweet, Visalia and Miss Annie Mitchell, Visalia (just Visalia would reach them, they are well known there) would be best bet on photos, plus Joe Doctor at Exeter, Calif. He is well known there. He worked for W.S. Clawson, who published the Exeter Sun and W.S. (Watt) Clawson was quite familiar with the Mineral King country. I suspect he might be dead.

Sincerely
