

Dear Sir

Thanx for the articles - It's nice to get all that information in one place - some research! Bet it was never integrated before like that. They are asking the Celilo families now, which Reservation each family would rather move to. Personally I think it will better the status of the majority

of them to move. Too
close to this town for
most of them - especially
the men. Nothing to
do most of the year
so the women make
a living doing beadwork
and the men drink.

Very large mortality of
babies each winter.

Adios

Julian F. Smith
