Traced down this pic yesterday and according to old timer this is siphon and flume in Cottonwood Canyon in the Tieton. The siphon is attached to Lateral G, one of main laterals in the division. It is a wood stave siphon built either in 1910 or 1911. Best location I could pinpoint would be on the Cottonwood Road, about four miles west of Wiley City. Not certain but believe flume no longer is there.
