

Had an itch to write

Friday

Dear Click:

Your book was dispatched this morning. Thanks you for the check - you are a trusting soul to send it before receiving the goods!

I'm sorry - I don't have much but general reference books in my possession - have never been much interested in any particular subject & have word so much that I didn't collect much to move. The only thing I have on Indians is "King of the Tulares" by Anne Mitchell of Alaska. You probably have one of these, but if you want mine I shall be glad to send it - as a gift - I don't believe it has much historical value.

Yes, I plan to live in Wenatchee. I don't care for it much, but all who are dear to me are there or close by, & I have been alone long enough. My favorite niece is alone with two little girls to rear, so I am going to be with her and the children. I am very happy about that - it will give my "golden years" a real meaning. No doubt both the kids & I will have to adjust

"to my old maidishness" - but we
need each other, so we'll adjust.
I've always been crazy about birds,
as you may know.

Why don't you wait for cool
weather to go to California?

So Ginny has a horse. Is it
a special breed, as your cat
is? Don't work too hard digging
those post holes.

I shall certainly call you
if I pass thru Yeldine.

My love to both of you

Annusue Hughes
