TOP LOADER KILNS

TOP LOADER Electric Kilns answer a long felt need for an economical, yet efficient electric kiln. It's Top Loader construction allows element placement on all four sides, achieving an extremely even distribution of heat. They are extremely easy to stack as it is possible to see each shelf in it's entirety, assuring close stacking without touching. Constructed of heavy gauge steel, beautifully finished in lustrous green hammertone, with heavy insulation brick. STANDARD kilns (2150 deg. F.) have nichrome wire elements, HI-FIRE kilns (2300 deg. F.) have Kanthal wire elements, both with recessed refractory lid as pictured. All wire is U.L. approved cord and plug installed ready for use. All Kilns listed have pilot lights and 3 position switches installed. The fire chambers are face hardened to minimize brick flaking in use. With each kiln an 8 page booklet is supplied which gives general firing instructions for ceramics and metal enameling as well as information relating to pyrometers.

Pyrometers may be installed on all kilns for \$25.00. Replacement elements are \$3.50 and up. All prices shown are F.O.B. New York.

TOP LOADER KILNS - 4 to 4 1/2 Firing Hours to 1950° F.
