Nov. 13, 1963

Dr. Donald Clark,
Cannon Hunters Association of Seattle,
Lawton Wood, Seattle 99, Wash.

Dear Don:

An enclosure for you, insufficient, I will admit, for the very fine issue of Cannon Hunters. It goes into my "secret" file of rare material, and I'm convinced that when book dealers, researchers etc. go on trail of such material by about 2,034, my copies will command a premium price and any extras you have on hand then you can dispose of for a nice price.

You did a wonderful job. And if a "deficiency" assessment is necessary on the publication, drop me a reminder.

Dean G, Mrs. G., Vic Hurley and Mrs. Hurley with Mrs. R. spent a nice time at luncheon the other day, only time we could get together for weeks. Tried to find out what 's holding Dean up on whatever project he is working on. Right now he is corresponding relative to a picture of a "Nez Perce" reported, in recent edition of Seattle PI on a Mrs. Alcorn article. This picture was used by McWhorter, identified by him as one of the Meninicks (In ~~Tragedy~~ Crime Against the Yakima). Meninnick family has identified it as their kind. Mrs. Alcorn writes Dean that "she should know who he is, has known him so many years etc. and he gave her the picture;" etc. So, what can you do? Maybe PI and Mrs. A could be cured of digging up from the past if some day member of some family brought some kind of action in the court of last resort? Drastic way to cure or get at the bottom of things. Don't know how Dean got mixed up with such correspondence. I've too many other things to do.

There's a State Board meeting at Seattle Dec. 7 and I hope to be there if blizzards don't prevent.

Been (and this has been going on for years) accumulating more and more material on Samuel Hill. One of these days will be spending some time in Seattle if I get the chance. Meanwhile, will you keep your eye open for a building that might still be in existence, a Pacific Exposition Good Roads Building he built and gave to the U of W after the Exposition. It was located on the campus for some time. Figure you should know what happened to it. I could use a picture of it for my files if you get a chance to snag one (snapshot ok) or spot its location for me and I'll do the dirty work with my Roli when I'm over. And if you are around Tacoma on the 7th, will certainly want to see you. Our board is 10 a.m., then lunch.

Am going to give your address to a Mrs. Norman Gossett of Naches who has for some time been researching and is a thorough researcher. Anything you can assist her on when she writes, will be appreciated. ~~Her knowledge of "gaboys" will be appreciated.~~ ~~the best~~ Click
