Did you look for an item in our catalog which you did not find? If so, list it here. Perhaps we can expand our stock to include it.

All orders will be shipped by parcel post (or UPS in New England). The shipping weight of each item is given with the catalog description. Multiply the shipping weight of each item by the number of items ordered. List the total shipping weight for each entry in the shipping-weight column of this order form. Add the weight of all items in pounds and ounces, then change ounces in excess of 16 to full pounds (16 ounces equals 1 pound).

All items will be shipped from Cambridge, Massachusetts. From the map in the catalog, determine your zone number for shipments from Cambridge. If you live near a zone boundary, use the more distant zone. Then using this zone and the estimated weight of this order, determine the shipping charge from the table of parcel post rates below.

Any overpayment will be refunded.
