Just another clipping, sent me today by a friend, knowing my weakness, and I thought there may be a name or date you haven't unearthed. you could use

I do not know what paper, possibly Tacoma, as she lives there. but could ask her if you are interested

The name Awki is very familiar to me as several of the descendants went to school in Wapato with my daughters and their little Awki's are all over the Reservation

Sincere Thanks for the many marvelous columns of our First-Americans and other revelations of the past

Yours Muchly
