

U. S. DEPARTMENT OF COMMERCE

Jesse H. Jones, Secretary

BUREAU OF THE CENSUS

William Lane Austin, Director Vergil D. Reed, Assistant Director

SIXTEENTH CENSUS OF THE UNITED STATES: 1940

RETAIL TRADE—WASHINGTON—1939

Retail sales in the State of Washington totaled \$668,790,000 in 1939, an increase of 28 percent over 1935. The total is 10 percent less than the dollar volume reached in 1929, when the general level of consumer goods prices was materially higher.

The number of stores increased 5,846 or 28 percent in the ten-year period, compared with a gain in population of 157,980 or 10.1 percent. The population count is preliminary and still subject to revision. Stores numbered 20,836 in 1929, 23,887 in 1935 and 26,682 in 1939, the gain since 1929 including 1,287 food stores, 1,956 filling stations and 3,105 eating and drinking places, as well as 495 fuel dealers and 94 florists. An increase of 1,287 in the number of food stores is caused in part by reclassification of certain general stores (with food) which in recent years have become entirely or predominantly food stores.

The number of employees is 19 percent higher than in 1935, and higher even than in 1929 because of a greater use of part-time employees. Pay roll is 36 percent higher than in 1935 but 6 percent less than the record pay roll of ten years ago. A comparison of State totals for the three census years follows:

YEAR	Population	Stores	Sales	Propri- etors	Employees	Pay roll
1939.....	P/1,721,376	26,682	\$668,790,000	24,798	66,852	\$75,405,000
1935.....	-----	23,887	521,186,000	22,046	56,377	55,327,000
1929.....	C/1,563,396	20,836	745,891,000	19,808	65,758	80,639,000

P/ Preliminary, 1940. C/ 1930 Census.

COUNTIES

Of the 39 counties in Washington, 16 show sales of more than \$10,000,000 each and account for 90 percent of total sales in the State. King County with Seattle leads in stores and sales by a wide margin. Spokane County with Spokane is second, followed closely by Pierce County with Tacoma. The other counties exceeding \$10,000,000 in sales are, in order: (4) Yakima County with the city of Yakima, (5) Snohomish County with Everett, (6) Whatcom County with Bellingham, (7) Grays Harbor County with Aberdeen and Hoquiam, (8) Chelan County with Wenatchee, (9) Kitsap County with Bremerton, (10) Clark County with Vancouver, (11) Cowlitz County with Longview, (12) Thurston County with Olympia, (13) Walla Walla County with the city of Walla Walla, (14) Lewis County, (15) Skagit County and (16) Whitman County. Stores, sales, personnel and pay roll are shown for these and all other counties and cities in table 16. A breakdown of stores and sales in each county by 11 major business groups and five separate kinds of business is shown in table 15.

CITIES OF MORE THAN 10,000

There are 14 cities of more than 10,000 population in Washington. They account for 46 percent of the population, 54 percent of the stores and 69 percent of total retail sales in the State. In the following table the current sales are compared with those shown in previous censuses, but 1935 and 1929 figures for cities have not been adjusted to exclude repair garages, which were classified as retailers in those years but are now included in the Service Census.

CITY	POPULATION		SALES					
	Pre- limi- nary 1940	Percent change 1940 vs. 1930	Amount (add 000)			Percent change		
			1939	1935	1929	1939 vs. 1935	1939 vs. 1929	
Total, the State	1,721,376	+10.1	\$668,790	\$521,186	\$745,891	+28	-10	
Total, 14 cities	800,135	+ 2.3	461,972	366,434	541,783	+26	-15

Yakima.....	27,153	+22.9	22,766	19,826	23,729	+15	-4	
Aberdeen.....	18,624	-14.3	12,018	9,433	18,441	+27	-35	
Walla Walla.....	18,104	+13.3	11,747	10,820	14,595	+ 9	-20	
Vancouver.....	17,753	+12.5	9,661	7,103	9,200	+36	+ 5	
Bremerton.....	15,076	+48.2	10,009	6,612	7,214	+51	+39	
Olympia.....	13,178	+12.3	11,440	8,323	8,897	+37	+29	
Longview.....	12,261	+15.1	7,001	4,417	6,324	+59	+11	
Wenatchee.....	11,590	- 0.3	10,727	10,174	17,566	+ 5	-39	
Hoquiam.....	10,810	-15.3	3,578	2,716	5,883	+32	-39	

Separate reports for each of these cities, by kinds of business in as much detail as can be shown without disclosure of individual operations, are presented in table 17 herein.

RETAIL TRADE—WASHINGTON—1939

KINDS OF BUSINESS

In table 1, which compares retail trade in 1939 with that in 1935 and 1929, comparisons between some business classifications may be affected by (1) incomplete coverage in 1935, the possibility of which exists because that Census was on a voluntary basis and in some localities reports were not obtained from all stores; or (2) shifts in classification caused by incomplete commodity information in 1935. The latter may result in shifts between groups or between kinds of business within a group, such as within the food group or the apparel group, and may affect direct comparisons with 1935, of particular classifications. The qualification does not apply to comparisons with 1929.

Changes in the nature of a store's business, which may occur suddenly or gradually over a period of years by reason of new and stronger competition, or by reason of sales opportunity, may change a store's classification without affecting the validity of the comparisons. An example is the growth of combination stores (groceries and fresh meats) in the food field by the addition of fresh meats in grocery stores, and groceries in specialized meat markets, to meet consumer preference or convenience. Other examples are the conversion of eating places into drinking places, and service garages into filling stations. Likewise, the continued decline since 1929 in the number and sales of general stores (with food), shown in the accompanying tables and similarly observed in other States so far completed, does not imply that those which have disappeared from the classification have gone out of business. Many still described as general stores on their schedules are shown by their commodity sales analysis to be predominantly food stores, or feed stores or filling stations or general merchandise stores selling little or no food, and are so classified. They may be buying through entirely different wholesale channels than in 1929.

Principal changes since 1935 and 1929 are as follows, subject to some qualifications as noted above:

1 - Food stores increased 21 percent in number but lost 6 percent in sales since 1929, although they gained 25 percent in sales since 1935. In comparison with 1929, grocery and combination stores (groceries with fresh meats) increased 38 percent in number and 20 percent in sales. Most of the gain is in combination stores, which increased 146 percent in number and 115 percent in sales, while grocery stores lost 27 percent and meat markets lost 54 percent.

2 - Stores which conform to the census classification of General Stores, in which food constitutes a substantial proportion of total sales, declined 73 percent in number and 71 percent in sales since 1929, dropping from 1,001 in 1929 and 609 in 1935 to 274 in 1939. Sales in this kind of store in the three years were \$35,865,000, \$18,245,000, and \$10,560,000, respectively.

3 - In the general merchandise group, variety stores have increased 68 percent in number and 30 percent in sales since 1935 and are 47 percent ahead of 1929. Department stores gained 24 percent in sales since 1935, but are nearly 10 percent under their dollar sales of 1929. Dry goods and general merchandise stores have lost 44 percent in number and 51 percent in sales since 1929, although they also are well ahead of 1935 in sales. The general merchandise group as a whole is 27 percent ahead of 1935 in sales but is 11 percent below the dollar volume reached in 1929.

4 - The apparel group, with a small increase in apparel and shoe stores, increased its sales 20 percent since 1935 but is 24 percent below its dollar volume of 1929.

5 - The furniture-household-radio group increased its sales 22 percent since 1935, but is still 39 percent under the dollar volume of 1929. The latter is affected by the general lowering of furniture, radio and household appliance prices during the last ten years, although the number of furniture stores is somewhat less than in 1929.

6 - The automotive group—vehicle dealers and auto supply stores--increased 20 percent in number and 36 percent in sales since 1935. The group is 23 percent below its record volume of 1929.

7 - The continued increase in filling stations and their sales observed in other States is evident also in Washington. Filling stations increased from 2,457 in 1929 and 3,628 in 1935 to 4,413 in 1939; in the same years their sales were \$28,415,000, \$38,287,000, and \$56,306,000, respectively. With nearly twice as many stations as in 1929 to do twice as much business there are nearly twice as many employees and pay roll has doubled since 1929.

8 - The lumber-building group gained 51 percent in sales since 1935 but is still 12 percent below its dollar volume of 1929. The hardware group reports 29 percent higher sales than in 1935, only 8 percent less than in 1929. This group includes hardware stores and hardware-tractor-farm implement dealers.

9 - Eating places, with a 13 percent increase in number, increased their business 27 percent since 1935. Drinking places, many of which also serve meals, increased 23 percent in number and 52 percent in sales in the last four years. The combined sales of eating and drinking places total \$54,869,000 in 1939 in comparison with \$34,399,000 for eating places in 1929 when liquor sales were prohibited. Packaged liquor stores add another \$14,547,000, up 16 percent since 1935.

10 - Drug stores, with little change in number, are 27 percent ahead of 1935 in sales and within 10 percent of their 1929 record. Cigar stores and stands have decreased 67 percent in number and 74 percent in sales since 1929, while news dealers' sales decreased 81 percent.

11 - Fuel, ice and fuel-oil dealers have increased 160 percent in number and 7 percent in sales since 1929, with a 27 percent gain since 1935. Feed, farm and garden supply stores gained 81 percent in sales since 1935, but are 41 percent below their 1929 record sales. Jewelry store sales are 75 percent higher than in 1935 but still 26 percent under the dollar volume reached in 1929. Florists increased their sales 58 percent over 1935 and 10 percent over 1929.

The facts on which these comparisons are based are shown in greater detail in table 1 of this report, which compares stores, sales, proprietors, employees and pay roll by kinds of business. A further expansion of the 1939 figures is shown in table 2, which also includes inventory figures as of the close of 1939.

EMPLOYMENT AND PAY ROLL

Retail store employees in Washington increased in number from 56,377 in 1935 to 66,852 in 1939, a gain of 19 percent. The total is 1,094 (2 percent) greater than the number employed in 1929. Pay roll increased more than \$20,000,000, from \$55,327,000 in 1935 to \$75,405,000, or 36 percent but is 6 percent less than the pay roll of 1929. There are 5,771 fewer full-time but 6,865 more part-time employees than were working in retail stores in 1929. Pay roll includes wages, salaries, sales commissions and bonuses, and the total paid in 1939 is equivalent to \$1,334 each for full-time employees and \$462 each for those working part time. The figures are shown in detail by kinds of business in table 2 of this report, and for full-time and part-time employees combined in the city table (table 17). Comparisons with previous censuses are provided by table 1. Totals for each county and incorporated place of more than 2,500 population are shown in table 16. Later reports of the Retail Census will show monthly employment, the extent to which employment varies throughout the year, and the number by sex. Comparable data have been published for 1929 and 1935.¹

PROPRIETORS

In addition to paid employees, which include executives if the business is incorporated, there are 24,798 active proprietors of unincorporated businesses, compared with 22,046 in 1935 and 19,808 in 1929. The increase since 1929 is 25 percent, compared with an increase in stores of 28 percent. Proprietors' compensation is not included in pay roll. Later reports will show the amount of withdrawals of those who assign to themselves a fixed salary or drawing account, and the number of unpaid family members. The services of proprietors and family members active in family-operated stores and service businesses are a factor of considerable importance in measuring the true amount of gainful employment in business.

INVENTORY

Stocks of merchandise on hand for sale at the end of 1939 totaled \$81,527,000 at cost valuation, equivalent to about two months' sales. Reflecting speedier merchandising technic and transportation, and affected in part by the increased proportion of sales by kinds of business in which stocks are small in proportion to volume (such as filling stations and restaurants), total stocks of merchandise were 25 percent lower while sales were 10 percent lower than in 1929.

SCOPE OF THE CENSUS

This report is one of the State series of retail reports presenting basic facts as to stores, sales, proprietors, employees, pay roll and inventory of retailers by kinds of business, for counties and incorporated places of more than 2,500 population, with separate tables for cities of more than 10,000 population.

The facts were obtained in 1940 by a complete field canvass of retail stores throughout the United States, conducted under the supervision of the regular field organization of the Bureau of the Census. The period covered is the calendar year 1939, or in some cases the fiscal year ended nearest December 31, 1939. Comparisons are with similar censuses for 1929 and 1935.² A census for 1933³ is available, but is not referred to in the comparisons.

Much additional information about retail trade in each State will be presented in the Retail Census volumes of the Sixteenth Census of the United States, which will follow after the State and city reports are completed.

TRADE AND SUBJECT REPORTS

In addition to the Retail Census volumes referred to above, there will be a series of trade reports bringing together all pertinent available Census data for each of the principal trades or kinds of retail business (such as food retailing, automobile retailing and financing, gasoline and oil distribution, hardware stores, apparel stores, drug stores, etc.), and a series of subject reports to include retail credit and receivables, retail chains, sales by commodities, and other subjects covering more than a single trade.

CENSUS OF BUSINESS

The current Census of Business covers retail trade, wholesale trade, the distribution of manufacturers' sales through primary channels, the construction industry, sales finance companies, service establishments, laundries, cleaning and dyeing plants, hotels and tourist courts and tourist camps, and motion-picture theaters and other places of amusement. Reports will be published for each of these fields of business.

The Census of Business is conducted under the supervision of Fred A. Gosnell, Chief Statistician for Business. Retail reports are prepared by John Guernsey, Distribution Economist for the Census Bureau, and James O. Reid, in charge of the Retail Census.

* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

¹ Previously published totals for the State and for the automotive group, for 1935 and 1929, are revised to exclude service garages and other automotive service businesses whose receipts from service sales exceed their sales of merchandise. These are now included in the Census of Service Establishments.

Other second-hand stores.	157	668	148	121	77	44	86	72	14	257

* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

1 Previously published totals for the State, for 1925 and 1929, are revised to exclude service garages and other automotive service businesses whose receipts from service sales exceed their sales of merchandise. These are now included in the Census of Service Establishments.

2 Not available.

3 Includes 3 hard-goods stores (auto supplies, hardware items, household appliances, sporting goods and often furniture). 12
