Dear Sir -

Thank you for your prompt reply, and for the proper places to place my ^{mail} address.

In today's ^{mail} I received the two acher pictures from the Army Engineers from Walla Walla, Wn

I am so happy you are going to do a article on the older Indians of this area. ^{apide, Rich, and Indians} Mrs. Seely and I have a recording of the speech given by the Chief to the Army Engineers, Dr. Timmer of Galdendale and the Vista workers was going to see if the chief of the ~~Rock~~ Rockcreek Indians would translate it to english. It was given us in confidence, and only with the tribes permission would we agree.

altho I am what you would call a late commer to this area 1950. I have found it fascinating, and the future potential for us along the river should be very interesting. If ever I felt the lack of proper education to put it down as it should be, its now. The last 8 years have been, frustrating, heartbreaking, enlightening and excitement filled years. The coming years holds promise of many good events as well as more frustrations.

To change a sleepy relaxed area into full activity has brought some lively action, to say the least.

Am looking forward to your visit.

Sincerely yours

Mrs Dorothy Clark
