

Washington State Ferries

SEATTLE FERRY TERMINAL, SEATTLE, WASHINGTON 98104 • MA 4-2700

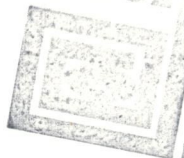

FOR RELEASE MARCH 11, 1967

This model shows the design of four super-ferries being built in San Diego for the Washington State Ferries by National Steel and Ship-building Company. The hull of the second vessel, the M. V. KALEETAN, was launched today. The HYAK, sister ship to the KALEETAN, was launched in December of last year and is scheduled to go into service on Puget Sound about mid-June. Both ferries will carry nearly sixty per cent more vehicles and passengers and travel some thirty per cent faster than the newest ferry now in use on Puget Sound.
