APPARATUS ANSWERS EVERY DEMAND FOR GREATER SPEED • POWER • TRACTION • SAFETY • IN MODERN FIRE-FIGHTING EQUIPMENT

Whatever the emergency, you can depend on FWD apparatus to perform in full measure with all the factors that count in fire fighting —speed that gains precious minutes getting to the fire—power to climb the steepest grade without slackening pace—full four-wheel traction to get through snow or mud-blocked streets—sure-footed safety for fast travel on wet, slippery pavements.

The two driving axles of an FWD, delivering powered traction to front as well as rear wheels, are double assurance that it will bring men and equipment to the fire in less time and with safety—under all conditions of road and weather.

THE FOUR WHEEL DRIVE AUTO COMPANY

Canadian Factory, Kitchener, Ontario

Seattle, Washington

Firemen! Your FIRST DUTY is to SAVE LIVES! The FIRST DUTY of your community is to give you the proper equipment to perform that duty—without needless risks to you or those whose lives you protect. To your first duty and to the first duty of the community to YOU—the answer Is B-E EVACUATORS!

FIREMEN! YOU MUST BE SAFE TO SAVE OTHERS!

The B-E EVACUATOR IS A NEW, QUICK, EFFICIENT METHOD OF LIFE PROTECTION! It eliminates the guesswork of jumping, carrying people down ladders and many other desperate chances that firemen are otherwise forced to take! Almost universal in application, it can be easily carried up a ladder by ANY fireman, attached to any window and most roof parapets. FIRE and WATER PROOF, the workmanship and materials used in B-E EVACUATORS enable us to guarantee them for an unlimited time.

Write us TODAY for a demonstration in your town or city, anywhere in the U.S.A.—without the slightest obligation, of course!
