Lions Contribution to Yakima

Among the features that make any city attractive and distinctively outstanding must be listed the parks and playgrounds that foresight and community spirit have provided. Yakima under the direction of its Metropolitan Park Board is rapidly becoming one of the so designated leaders in the northwest. The local Lions Club has had no small part in this development, having throughout its twenty-seven years of organization held park and playground development in the forefront as an objective goal.

Lions Park, now one of the show places and most actively patronized recreation spots of our city, was at the time the Lions purchased it but an ugly eyesore covered by boulders, refuse and garbage; under the Lions direction it was purchased, developed and presented to the city and now is one of our public assets which we are all proud to use or show to our visitors. Washington Park was a similar waste place until it likewise was taken over by the Lions and the plot and funds again presented to the city for the development of another useful and beauty spot. Larson Park, though not a gift from the Lions, owes much of its recent development to their efforts; the maples lining its boundaries, the tennis courts, the lighted soft ball field and the beautiful lawn all have been developed by the aid of funds from the Lions Parks and Playground program.

The latest acquisition is the new five acre tract, near the southwest boundary of the city, just purchased and presented to the Metropolitan Park District for development in that rapidly growing suburb. In order to bring it into the active recreational life of our growing boys and girls and to further develop other needed beauty and recreational facilities, events such as this are being sponsored by the Lions and they in turn, each and every one wish to thank you most sincerely for your splendid cooperation.
