2V FLUOROSPRAY (in 16 or 32 oz. cans)

Produces a white, inert teflon-type film. No curing is required. Easy release where others fail. The best separator for such resins as epoxies, castable polyesters or phenolics.

4Q SPRAY SILICONE #1 (in 20 or 32 oz. cans)

General purpose release agent. Suitable for most plastic applications. Popular for production runs of zinc and aluminum die castings, thermoplastic plastics, and rubber parts.

7P SPRAY SILICONE #2 (in 20 or 32 oz. cans)

This silicone-type separator has the same range of usefulness as SPRAY SILICONE #1. Because it can be removed with a detergent wash, SPRAY SILICONE #2 is recommended over SPRAY SILICONE #1 for those parts which require painting or bonding.

3G OIL SPRAY (in 16 or 32 oz. cans)

A separator based on a soybean extract (lecithin) consisting of oil and surface-active agents. Residue is non-toxic and easily removed from the finished parts. This separator was specially formulated for releasing glass reinforced laminates (e.g. fiberglass and polyester resin) from well-sealed plaster and wood or metal molds. Resulting parts have good surface clarity.

			<u>Shipping Weight</u>
All Separators:	16 oz. can	\$2.00 each	1 lb. 8 oz.
	20 oz. can	2.25	1 lb. 12 oz.
	32 oz. can	3.00	2 lbs. 10 oz.

10% Discount on Orders over \$20.00
